Guidelines for the Leadership in Action Project

Please note:

Since the initial idea of the Leadership in Action Project must be submitted in English, a German version of the guidelines is not available.

Federal Ministry of Research, Technology and Space

1 About the Leadership in Action Project

- The Leadership in Action Project takes place over the course of six weeks during the second summer. It is conducted in a social or nonprofit setting abroad.
- Building on their research projects, students design and implement an impact project that applies their knowledge to real-world challenges and benefits communities.

2 Formalities

Please make sure that your initial idea for the Leadership in Action Project meets the following formal requirements:

- **Language:** You must submit the initial idea in English.
- **Length:** Your initial project idea must be no longer than 400 words.
- **Additional information:** Please do NOT include the applicant's name, a cover sheet, or any supplementary documents (e.g., CVs or certificates).

3 Content

Your initial project idea should be divided into the following parts.

(1) Proposed host institution and country

Start thinking about which host institution and country could be a good fit for your Leadership in Action Project. At this stage, an initial idea is all you need.

(2) Preliminary project description

Please describe your initial project idea. You will have the opportunity to further develop it throughout the Laidlaw Scholars Leadership & Research Programme. Use the following questions as a guide:

- What is your initial idea for the Leadership in Action Project?
- What are the project's objectives, and how do you envision its implementation and impact?

(3) Connection to the research project

Think about how your Leadership in Action Project could build on your research project. The two projects should be connected and complement each other rather than being developed independently. Use the following questions to guide your thinking.

- How does the Leadership in Action Project build on the research project?
- How might the experiences and insights gained through the Leadership in Action Project feed back into future research?
