

Applying for an X-Student Research Group

1 Name and signature of applicant

Note: If the X-Student Research Group is applied for in a team or tandem, the name and signature of the main applicant is sufficient.

last name, first name

2 Title of the X-Student Research Group

--

3 Institutional Affiliation

In order for the X-Student Research Group to be offered as a research seminar, an institutional affiliation is necessary. This affiliation is ensured by a professor who is informed about the application and who agrees with his or her signature to support the project in organizational matters (e.g. room allocation, technology).¹

¹ The teaching assignments for leaders of X-Student Research Groups are financed from funds of the Excellence Strategy.

X-Student Research Groups are low-capacity in the sense that they are primarily considered only in the extracurricular area and, if applicable, in the interdisciplinary area. However, if there are clear references to modules in subject-specific study and examination regulations, capacity effectiveness cannot be ruled out in individual cases.
